SUMMARY

A graduating software engineer with experience in building mobile and web applications.

PROJECTS

Customised Digital Food Labels

📅 10/2020 - 04/2021

🔗 <https://github.com/PetkoKuzmanov/Customised-Digital-Food-Labels>

Third year project for my Bachelor's degree

- Developed a food, weight and exercise tracking mobile application in Android Studio with Kotlin.
- Wrote a dissertation which includes background research for similar apps and reflection on developing my app.

Food Blog

📅 12/2020

🔗 <https://github.com/PetkoKuzmanov/Food-blog>

Assignment for the Web Application Development module

- Developed a website with Laravel in which chefs can post recipes.
- Visitors can search for recipes by tags and comment under the posts.
- Received a grade of 78%.

Breakout

📅 02/2021 - 04/2021

🔗 <https://github.com/PetkoKuzmanov/Breakout>

Assignment for the Introduction to Video Game Programming module

- Developed a copy of the retro game Breakout in Unity with C#.
- Added features, such as profile stats, replays, achievements and tutorial.
- Received a grade of 92%.
